Library and Information Centre

JSS Academy of Higher Education & Research with its commitment to learning has seven libraries which are committed to excellence in service and are learning centres with an excellent academic environment that facilitate learning and spark inquiry within learners that goes beyond the classroom.

Resources and Databases

What is OpenAthens?

- Single sign-on service
- Identity and access management tool
- Username/password system for logging in to digital resources; can use institutional accounts or create accounts in OpenAthens
- Access management tool that allows librarians to say who can access what
- Supports secure access using SAML 2.0, which transmits user data securely
- Fully cloud-based service (no need for subscriber to host) with 24/7 customer support

Additional information about personal data collection and usage

Your personal data

You are seeing this page because your institution's library services allow for personal account creation to support your research on the EBSCO platform. If you would like to use a personal account, please review the following and let us know if you consent.

- Yes. I consent to the collection of this personalized data which will allow EBSCO to provide me with a personal account. I understand the processing of my personal data is covered under my institution's contract with EBSCO. I acknowledge that EBSCO will collect and process my personal data including the categories and purposes of use for such data as described in EBSCO's [Privacy policy](#) and [What information is collected and how it is used](#).
- No. I do not consent to the collection of this personalized data. I understand that I can still access EBSCO's products without a personal account.

Cancel

EBSCO Privacy Policy:

We use the Personal Information we collect for the limited purposes of processing your transactions, establishing and/or verifying a person's or account holder's identity, customer service, improving and customizing our Services and their content, authorization, content processing, content classification, and providing you with information concerning our Services.

What is EBSCO Discovery Service ?

EBSCO Discovery Service is an all-inclusive search solution that makes in-depth research easy.

The platform offers sophisticated features and functionality that anticipate user intent, helping them get to exactly what they are looking for quickly and easily.

- Sophisticated Search — Rich metadata and superior relevance ranking technology
- Direct Access to Full Text — One-click access directly through the results list
- Intuitive Interface — Features and technology built on user research
- Superior Integrations — Apps and integrations with multiple platforms

RESEARCH STARTER

Healthy Brain Severe AD

Dementias.

DEFINITION: A group of disorders involving pervasive, progressive, and irreversible decline in cognitive functioning resulting from a variety of causes.

Salem Press Encyclopedia of Health, 2024

Other topics: [Dementia with Lewy bodies \(DLB\)](#), [Psychology of dementia](#), [Frontotemporal dementia \(FTD\)](#).

[Read more →](#)

Research Starters is a feature in *EBSCO Discovery Service* (EDS) that provides links to citable, authoritative summary articles for thousands of popular topics. Designed to assist users with their research, this feature was developed based on extensive studies with undergraduate and graduate students.

Results Page:

The screenshot shows a search results page for the term "dementia". The search bar at the top contains the text "dementia". Below the search bar, there are filter buttons: "All filters (2)", "Full Text", "Peer Reviewed", "All time", and "Academic Jou...". The search results are displayed in a list format. The first result is a peer-reviewed journal article titled "Neuroimaging and Clinical Findings in Healthy Middle-Aged Adults With Mild Traumatic Brain Injury in the PREVENT *Dementia* Study." The abstract mentions that traumatic brain injuries (TBI) represent an important, potentially modifiable risk factor for dementia. The article is published in JAMA network open, 2024 Aug 01, and is available in MEDLINE Ultimate. The authors listed are Low A, McKiernan E, Prats-Sedano MA, Carter SF, Stefaniak JD, and Su L. The second result is partially visible and titled "Acceptability and preliminary effects of the volunteer-supported Meaningful Moments program to engage older adults with advanced dementia on a hospital-based specialized dementia care unit: a mixed methods study."

The filter panel on the right is titled "All filters" and shows the following filters applied: "Academic Journals" and "Full Text". Under "Advanced search", the "Full Text" filter is checked. Other filters include "Peer Reviewed", "Catalog Only", "Available in Library Collection", and "PDF Full Text". The panel also shows expandable sections for "Publication Date", "Content provider", "Source Types (1)" (Academic Journals), "Subject", and "Publisher". At the bottom of the panel are "Clear All" and "Apply" buttons.

Filters available in EDS.

Results Page:

The screenshot shows the EBSCO search interface. At the top left is the JSS logo (JSS ACADEMY OF HIGHER EDUCATION & RESEARCH, DEEMED TO BE UNIVERSITY, MYSURU). The search term 'dementia' is entered in the search bar. Below the search bar are filters: 'All filters (2)' and 'Full Text'. On the left side, there is a navigation menu with sections: 'My dashboard' (Overview, Projects, Saved, Searches, Viewed, Holds & checkouts, Journal alerts) and 'Research tools' (New search, Publications, Concept map). At the bottom left is a 'Links' section.

The 'Cite' dialog box is open, showing citation information for a journal article. The article title is 'Neuroimaging and Clinical Findings in Healthy Middle-Aged Adults With Mild Traumatic Brain Injury in the PREVENT Dementia Study.' The authors are 'Low A; McKiernan E; Prats-Sedano MA;' and the year is '2024'. Below the article information are two buttons: 'Copy citation' and 'Export citation'. A message states: 'Consult your library for more information on citing resources and follow specific requirements from your instructor.' Underneath is a 'Select style:' dropdown menu with the following options: 'ABNT (Brazilian National Standards) Chicago 17th Edition (Author-Date)', 'Harvard', 'Harvard: Australian', 'MLA 9th Edition (Modern Language Assoc.)', 'Chicago 17th Edition (Notes & Bibliography)', and 'Vancouver/ICMJE'. The 'Vancouver/ICMJE' option is highlighted with a red box. Below the dropdown is a 'Copy to clipboard' link.

The screenshot shows the EBSCO search interface. At the top right is the 'MyEBSCO' logo. The search bar contains the search term 'dementia'. Below the search bar is the 'Advanced search' button. The search results are displayed in a list format. The first result is 'Neuroimaging and Clinical Findings in Healthy Middle-Aged Adults With Mild Traumatic Brain Injury in the PREVENT Dementia Study.' The second result is 'Supported... an advanced... nit: a mixed'. The search results are displayed in a list format with a search bar at the top right and a 'MyEBSCO' logo.

Available citation styles in EBSCO.

Results Page:

The image shows a search results page for the term "dementia". A modal window titled "Cite" is open, displaying the following information:

- Journal Article, Multicenter Study
- Impact of social network composition on cognitive decline: Digital Dementia Registry Bavaria (digiDEM Bayern).**
- Laininger L; Dietzel N; Graessel E; 2024
- + 9 more items

Below the citation information, there are two options: "Copy citation" and "Export citation". The "Export citation" option is highlighted with a red box. Underneath, it says "Export to your citation tool of choice" and lists several options:

- [Export in RIS format](#) (e.g. CITAVI, EasyBib, Mendeley, NoodleTools, ProCite, RefWorks, Zotero, etc.)
- [Export to EasyBib](#)
- [Export to RefWorks](#)
- [Export to EndNote Web](#)
- [Export to NoodleTools](#)

The modal also includes a "Close" button at the bottom right.

Exporting citations to bibliographic management software.

Background

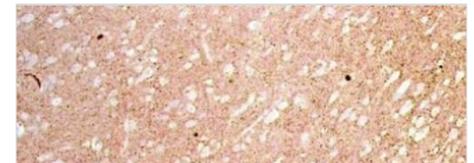

- Dementia with Lewy bodies (DLB) is a progressive dementing illness associated with fluctuating cognitive impairment, visual hallucinations, and features of parkinsonism.
- DLB is the **second most common type of degenerative dementia** in older patients (after Alzheimer dementia) and is diagnosed in about 10%-15% cases of dementia.
